About Nuance CDE One (Clinical Documentation Excellence)

Nuance CDE One is an Azure cloud-hosted artificial intelligence (AI) powered customizable prioritized worklist and Clinical Documentation Integrity (CDI) workflow management solution. CDE One evaluates and prioritizes patient encounters based on all documentation evaluated by our AI engine, to optimize CDS productivity and CDI program efficiency. The AI quickly identifies the best opportunities for clarification impact and makes the key evidence clearly visible on the Triage Worklist screen and the CDS Assistant. It helps to increase the potential for improved Case Mix Index (CMI) and accurate reimbursement, while appropriately capturing alternative principal and secondary diagnoses that influence DRG assignment, the severity of illness, and risk of mortality. CDE One's comprehensive CDI workflow management tools ensure CDSs can capture the essence of the patient story throughout the encounter, accurately code the encounter for both working and possible DRGs, send and track clarifications, and reconcile to accurately measure the CDI program's impacts. Lastly, CDE One's powerful analytics provide key insights into the staff, physician and program performance.

Known Issues

No updates in this release.

Regulatory Updates

Solventum Update July 2026 (Main-GA)

Schedule/setup changes

APR_DRG_ND_BCBS:

- Added Grouper version 43.0 with HAC version 43.1, effective July 1, 2026.
- Added new weights file, effective July 1, 2026.

APR_DRG_IL: Added new fees file, effective January 1, 2026. These fees are automatically determined.

APR_DRG_IN: Expanded the Medical Education field length from 7 (#####.##) to 10 (#####.###).

APR_DRG_WY:

- **Grouper:** Added Grouper version 43.0 with HAC version 43.1, effective July 1, 2026.
- **Setup:** Updated the Hospital Type label from Rehab Hospital to CAH with OB Services for value 5.
- **Weights:**
 - Added weights file, effective July 1, 2026.
 - These weights are automatically determined.
- **Outlier Thresholds:** Updated mandated outlier threshold values, effective July 1, 2026:
 - CAH: 29,595.57.
 - Children's Hospital: 315,622.04.
 - Psych Hospital: 12,562.06.
 - Acute Care Hospital: 42,524.88.
 - Non-participating Hospital: 42,524.88.

Added mandated outlier threshold value for CAH with OB Services: 29,595.57, effective July 1, 2026.

Clinical Strategy

Updated Clinical Strategy content across CDE, Knowledge Base, and Knowledge Base AI for Q2 2026.

Corrections

Table 2: Corrections

Description	CDE Triage/CDE One/ CDE Analytics
Fixed an issue where Additional Reimbursable Secondary Dx (on the Post Discharge Review Checklist screen) was incorrectly selected as the potential impact when no CC/MCC was present on the Reconciliation screen.	CDE Triage

Enhancements

Table 3: General Enhancements

Enhancement	Reference
Payer Updates When the payer changes via HL7 or from the patient banner, the  indicator appears in the following locations: - On the Triage Worklist, under the Payer column. - On the Patient banner, next to Payer. Point to the indicator to view the previous and current payer. The Encounter History and Audit Trail are updated when the Payer changes.	Triage Worklist Columns and Descriptions topic in Chapter 4 of CDE One User Guide.
Admit Service Updates When the Admit Service changes through HL7, the  indicator appears in the following locations: - On the Triage Worklist, under the Admit Service column. - On the Patient banner, next to Admit Service. Point to the indicator to view the previous and current admit service. The encounter history and audit trail are updated when the Admit Service changes.	Triage Worklist Columns and Descriptions topic in Chapter 4 of CDE One User Guide.
Document View Zoom You can now zoom in or out of the Document View panel. - Zoom levels range from 25% to 200%. - The default zoom level is 100%. - The selected zoom level applies only to the Document View panel and is retained in the browser for future sessions.	Zoom the Document View topic in Chapter 5 of CDE One User Guide.
Knowledge Base Icon AI A new Open Knowledge Base AI  icon has been added to the upper-right corner of the Nuance CDE screen. Use the Knowledge Base AI to search for medical conditions and view supporting source information, including references This icon is available on the following screens and their tabs: - Triage Worklist and Encounter View - Analytics Reports - Audit Trail Search Results	About Knowledge Base AI topic in Chapter 13 of CDE One User Guide.

Enhancement	Reference
Notification Subject Addition Clarification notifications now display the clarification subject, allowing users to identify the context of a clarification before opening the encounter. If the subject is too long to fit within the notification area, it is truncated with an ellipsis (...). Point to the notification to view the full subject.	Working with Notifications topic in Chapter 9 of CDE One User Guide.
Custom Worklist Sharing The Nuance Administrators and CDS Managers can now share the custom worklist with Coder, Quality Auditor and Case Manager roles from the Custom Worklists menu.	Sharing a Worklist topic in Chapter 4 of CDE One User Guide.
Relative Dates in Worklist Filters On the Nuance CDE screen, new date options are added to the following areas: • Triage Worklist Admit Date filter • Triage Worklist Discharge Date filter • Triage Worklist Advanced Filter As encounters are updated daily, these filters help you to sort encounters based on the date range of your choice. You can select a predefined date option or customize the date range. The following options are available: • Today • Yesterday • Last 7 Days • Last 30 Days • Custom As encounters are updated daily, the date options help you sort encounters based on the date range of your choice, reducing the need for manual date selection.	The following topics have been updated in CDE One User Guide topic in Chapter 4: • Triage Worklist Columns and Descriptions • Use Advanced Filters to refine search results • Relative Dates
Tracking Codes Display The Tracking Codes column on the Triage Worklist now displays all associated tracking codes for an encounter. Initially, only a few were visible. Now, you can view all ten codes, if available.	Triage Worklist Columns and Descriptions topic in Chapter 4 of CDE One User Guide.
GMLOS Display for APR Cases When an APR encounter displays a GMLOS value of 0.00 on the Triage Worklist, the system now displays the corresponding MS-DRG GMLOS value instead. This provides a meaningful length-of-stay benchmark for APR encounters. GMLOS Tooltip Updates The GMLOS tooltip now displays additional details, including the grouper type, grouper version, DRG, DRG description, and GMLOS value. This information helps you identify the grouper and DRG associated with the displayed GMLOS value.	Triage Worklist Columns and Descriptions topic in Chapter 4 of CDE One User Guide.

Enhancement	Reference
Visit Type Indicator on Patient Banner The visit type change indicator () is now displayed on the patient banner, allowing you to identify when an encounter has changed from one visit type to another.	Patient Banner Overview topic in Chapter 4 of CDE One User Guide.
Admit and Discharge Time Display Admit and Discharge time is now displayed on the Patient Banner and Triage Worklist. - Time is shown in HH:MM:SS AM/PM format. - If the time is not available, the system displays 12:00:00 AM. - You can also edit the time when updating admit or discharge dates. - HL7 updates override manually entered time.	The following topics have been updated in CDE One User Guide topic in Chapter 4: Triage Worklist Columns and Descriptions Patient Banner Overview
Admit Info Display on the Patient Banner Before this release, the Admit Info label was displayed as a single label on the patient banner. When you hovered over the label, the system displayed: - Admit Type - Admit Service - Admit Reason From this release: - The Admit Info label is no longer displayed as a combined label. - Separate labels are displayed on the patient banner: - Admit Type - Admit Service - Admit Dx Only the Nuance Administrator can enable or disable the display of separate Admit Type, Admit Service, and Admit Dx labels.	Admit Information Details topic in Chapter 4 of CDE One User Guide.
Search Last Names by Initials A new Last Name (Starts With) filter is available in the Advanced Filter on the Triage Worklist. You can use this filter to quickly narrow down encounters by the first few letters of the last name.	The following topics have been updated in CDE One User Guide topic in Chapter 4: Add conditions to narrow your search Use Initials to Search Last Names
System Attributes: Evidence and Codes You can now expand or collapse suggested codes associated with evidence under System Attributed in Clinical Evidence. This helps you focus on the codes relevant to your assessment.	Admit Information Details topic in Chapter 4 of CDE One User Guide.

Enhancement	Reference
Post-Discharge Review Warning When a Post-Discharge Review has been completed or expired, any additional updates received do not update the Final Coded Summary or Assessment. The warning message on the Reconciliation page has been updated to indicate that the Final Coded Summary and Assessment may not be up to date	System Attributes: Evidence and Codes topic in Chapter 4 of CDE One User Guide.
Date Picker in the Worksheet When you use the date picker  on the formatting bar in the worksheet, the selected date now includes your username (Last Name, First Name).	Formatting Text within the Sections topic in Chapter 4 of CDE One User Guide.
Quick View Screen Updates The Quick View screen now displays CDS name next to the account number.	Quick View topic in Appendices of CDE One User Guide.
Multiple Tracking Code Assignment You can now assign tracking codes to multiple encounters from the Triage Worklist(Triage Worklist > Add Tracking Codes ). You can now apply tracking codes to multiple encounters in a single action.	Assign Tracking Codes to Multiple Encounters topic in Chapter 4 of CDE One User Guide.
New Event Type A new event type CDI Note Created is added to the Audit Trail in the CDI component. The “Note Created” event is generated in the Event Type when a user creates a note in the Notes section of an encounter.	Audit Event Types topic in Chapter 7 of Facility Administrator and Nuance Administrator Guides.

Table 4: General Enhancements for CDE Analytics

Enhancement	Reference
MS DRG Group Summary Dashboard Update A new Total column group is added to the MS DRG Group Summary dashboard in the Peer Group Comparison report. It provides an aggregated view of CMI, encounters, and peer group comparison across the selected discharge date range, enabling users to evaluate overall performance. Also added a footnote, % of Total	MS DRG Group Summary topic in Chapter 6.
Clarifications Detail dashboard Update The following columns, KPI, and footnote have been added to the Clarifications Detail dashboard: Columns: • Escalated? • Escalation Type KPI: Escalated Clarifications Footnote: Escalated Clarifications  Note: When a clarification is escalated (Y), the entire row is highlighted in red font.	Clarification Details topic in Chapter 3.

Enhancement	Reference
Quality Impact Overview Dashboard Update Added Expected Mortality Variance and Expected Readmission Variance fields to the Quality Impact Overview dashboard.	Quality Impact Overview topic in Chapter 7.
S-DRG GMLOS Glossary Field Update Added a new glossary field, S-DRG GMLOS category. The field displays the geometric mean length of stay associated with the suggested DRG.	Analytics Glossary topic in the Encounter Details category.
